

Welcome!

Welcome to operating systems!

Please subscribe to the LSU Discord and add the channel for this class. We will use Discord for announcements, clarifications about assignments, pointers to cool resources, etc.

For Fall 2020, this class will be completely virtual. All lectures will be live via Zoom here: <https://lsu.zoom.us/j/126108881>

I'm asking you to *please* participate in the Zoom sessions with video ON. Please mute your mic when you're not speaking to avoid background noise. You can use your mic or the Zoom chat feature to ask questions.

Office hours will be in the same Zoom room.

I'll email you credentials for your 4103 classes.csc.lsu.edu account soon--all of the work can be accomplished there.

If you have access to a computer system that can run VMWare Workstation or Fusion and you're interested in using a Linux VM that I've configured, you can download it at the following link. You *only* need the NEW-Kali- one. This VM has all of the emulators installed that I'm using in the class to boot classic operating systems. It's optional--download only if you're interested:

<https://www.dropbox.com/sh/3xli5jyf0ngkzj0/AABHXCbnbyjQFrvGKux8cmgOa?dl=0> ;

The syllabus has details on office hours and more info on the course.

I'll be uploading slides as they are ready. Feel free to have a look around at the materials that are already uploaded.
