Basic Flowchart Symbols

These shapes are used to represent basic actions and steps in a program.

Symbol	Name	Function
	Start/end	An oval represents a start or end point
	Arrows	A line is a connector that shows relationships between the representative shapes
	Input/Output	A parallelogram represents input or output
	Process	A rectangle represents a process
	Decision	A diamond indicates a decision
	Connector	A circle is used to connect the flowchart across pages or multiple pathways in it
